To run a command as administrator (user "root"), use "sudo <command>".
See "man sudo_root" for details.

[analyst@secOps ~]$ sudo lsblk -o NAME,SIZE,TYPE,FSTYPE,MOUNTPOINT
[sudo] password for analyst:
NAME      SIZE TYPE FSTYPE MOUNTPOINT
├─sda      23.4G disk
├─┬sda1     1M part
├─┴sda2 23.4G part ext4  /
├─sdb       1G disk
├─┬sdb1 1023M part ext4
└─
```
